COMMUNICATION LAB

Communication is an art of learning a language. Communication skills is all about knowledge gained and expressed through professional a way. The objective of this The English communication language Lab helps students towards facing professional society to brand and create and become a part of the corporate culture in the society. The Lab creates a platform for students to be confident and skilled towards getting into a job after the completion of their Ug programme. Many students of different society face difficulty in communication, The lab provides them a space and an opportunity to build their language skills and participate towards enriching their language skills to build their career. The language lab follows two main parts. 1. Communication for Career development 2. Business communication. The language lab is facilitated with computer aided learning system where the student and individually use the software to learn language and their by acquiring knowledge. The lab also trains students towards soft skills, interview skills, Resume writing, Business English and interpersonal skills. The English communication language Lab is a well facilitated lab that enriches students towards building their skills towards corporate sectors.

7. parallelism via instructions
Unit-4
1. Memory Hierachy
2. Internal Organization of SRAM
3. Cache memory
4. Virtual memory
5. Page replacement
6. Internal communication methodologies(I/O & memory mapped I/O,Interuppt, DMA)
7. RAID(Secondary storage devices)
8. Difference between serial vs parallel bus architecture
9. Types of bus Arbitration
Unit-5
1. Parallel processing challenges
2.Flynn's classification
3. Hardware multithreading
4. GPU
5. Shared memory multiprocessor
6. Clusters & WSCs
7. Types of multiprocessor network topologies

CAO most important topics
Unit-1
1. Eight ideas
2. Components & operational units of computer system
3. Evolution & technology/generations of computer system
4. Performance
5. Addressing mode
6. Instructions-Representations, types
7. Logical & Control operation
Unit-2
1. Carry look ahead aadder
2. Design of Adder/Subtractor unit
3. Multiplication
4. Booth' Algorithm
5. Division
6. Floating point operation- Hardware Imple.
7. Subword parallelism
Unit-3
1. Building a datapath
2.Simple Control Implementation scheme
3. Pipelined datapath
4. Types of hazards
5.Branch prediction techniques
6. Exception handling
7. parallelism via instructions
Unit-4

Assignment- 2
1. A pipelined processor uses delayed branch technique. Recommend any one of the following possibilities for the design of the processor. In the 1st possibility, the processor has a 4- stage pipeline and one delay slots. In the 2nd possibility, it has a 6- stage pipeline & two delay slots. Compare the performance of these two alternatives, taking only the branch penalty into account. Assume that 20% of the instructions are branch instructions and that an optimizing compiler has an 80% success rate in filling in the single delay slot. For the Second alternative, the compiler is able to fill the second slot 25% of the time. Apr/May 2017
2. Explain in detail about how the exceptions are handled

CIRCULAR

DEPARTMENT OF TRAINING AND PLACEMENT

(Batch: 2016 -2020)

This is to inform that all the Eligible 2016-2020 Batch Students will undergo the undermentioned **TECHNICAL TRAINING FOR C, C++** conducted by SIX PHRASE as per the details given here under. The HODs and the Placement Coordinators of Departments concerned are requested to intimate the students regarding the above Training Programme. Attendance is made compulsory for all the students and absentees will be dealt seriously. The respective HOD'S are requested to detail a Placement Coordinators to monitor the conduct of the training and forward the list of absentees if any for suitable disciplinary action.

With a view to break monotony and to promote team learning, students from the 2016-2020 batches have been divided into branches and thus creating a heterogeneous team to promote peer learning from each other. It is therefore instructed that all the Eligible students undergoing the above training Programme to make use of the opportunity created to promote better teaching and learning experience. The details of allotment of class rooms can be refeed from Placement Cell notice board.

PROGRAMME SCHEDULE

- **Programme Duration : 72 Hours (12 Days)**
- **Date Schedule of the Classes : 14th to 22nd , 24th to 25th , 27th to 28th MAY 2019**
- **Time Schedule : 8.00 AM – 3.00 PM**
- **Lunch Time : 12.00 AM to 12.45 PM (as per their lunch timings)**

TRAINING AND PLACEMENTS

REPORT

DEPARTMENT OF TRAINING AND PLACEMENT

(Batch: 2016 -2020)

Department of Placement organized **TECHNICAL TRAINING FOR C, C++** conducted by SIX PHRASE for 12 days between 14.5.2019 to 28.5.2019 from 8.00 A.M to 3.P.M. Students actively participated in the training and gained knowledge in C and C++ programming language. Assessment was conducted to understand the students performance. Overall the session was interactive and effective.
